

ClaimIT

Contract Lecturer Monthly Claim System

ST10445055 –Joe Leo Van Niekerk

The Current Monthly Claim Process is Broken

- Lecturers **waste 2–4 hours** every month filling Excel/PDF forms
- Manual email submission → **claims get lost** or delayed
- Supporting documents sent via WhatsApp/email → **easily misplaced**
- Coordinators receive **50–200+ emails** per submission cycle → total chaos
- **No transparency**: lecturers have no idea if their claim was received, verified, or paid
- **High error rate**: wrong rates, missing documents, duplicate payments
- No audit trail → **disputes and arguments** every single month
- Payment **delays** of **weeks** due to back-and-forth clarification

Meet ClaimIT– The Complete Digital Solution

- 100% web-based – no installation needed
- Secure login for Lecturers, Coordinators & Managers
- Lecturers submit claims + upload documents in under 2 minutes
- Automatic hourly rate lookup & total calculation
- Full digital document management (PDF, Word, Excel, images)
- Beautiful Approval Queue with search, filtering, pagination & bulk approve
- One-click Verify → Approve/Reject with audit trail
- Real-time status updates for lecturers
- Complete history log – who did what and when
- Responsive design – works perfectly on desktop

Benefits of using ClaimIT

- Saves lecturers **3+ hours** per month
- Coordinators process claims **10× faster** with bulk actions
- Zero lost documents or emails
- Full transparency and accountability
- Drastically reduces payment disputes and delays
- Professional, modern system that faculty can be proud of

ClaimIT transforms a painful monthly chore into a fast, fair and fully automated process.

Claim Status Tracker

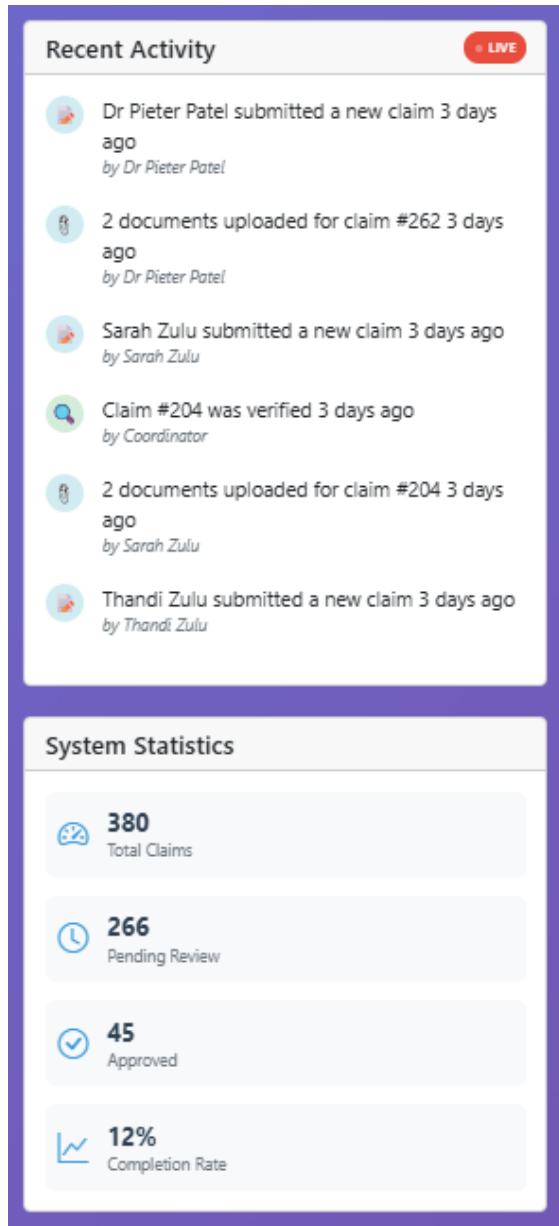

Logged in as **Mike Manager** - Processing: 74% of claims completed as of 08:25:39 PM

Claim Status tracker

Allows easy tracking of the state that each claim is in

Never have to wonder if a claim is pending , rejected or approved

Activity tracker and Statistics

See in real time what get added , removed , updated , etc.

See valuable information to take productivity to another level

Technologies Used

Frontend Technologies

CSS with Animations - Modern styling with transitions and effects

HTML5 - Semantic markup and modern web standards
Development Tools & Libraries

Visual Studio 2022 - Primary development IDE

SQL Server LocalDB - Local database for development

Git/GitHub - Version control and collaboration

Particles.js - Animated background effects

AOS Library - Scroll animation library

Bootstrap Icons - Comprehensive icon library

MVC Pattern - Model-View-Controller separation of concerns

Repository Pattern - Data access abstraction

Role-Based Access Control - Secure authorization system

RESTful Design - Clean API endpoint structure

Responsive Design - Mobile-friendly user interface

Backend Technologies

ASP.NET Core 9.0 - Modern, high-performance web framework

Entity Framework Core - Object-relational mapper for database operations

C# - Latest language features and performance improvements

Session-Based Authentication - Secure user authentication and authorization

Dependency Injection - Built-in IoC container for loose coupling

POE Submission - PROG6212
